## Why is Cryptocurrency the Future of Money?

## How is Cryptocurrency Generated?

A & B have Cryptocurrency wallets

Wallets are files that provide access to multiple Cryptocurrency addresses

Private kev

"B" tells his Cryptocurrency client that he'd like to transfer money to "A's" address

"A" creates a new Cryptocurrency address for "B" to receive money

B's wallet holds a private key for each of his address. Cryptocurrency client signs the transaction request with the private key of the address.

Public key

Anyone in the network can now use the public key to verify that the transaction request is coming from B

Select the header of the most recent block and insert it into the new block as a Hash

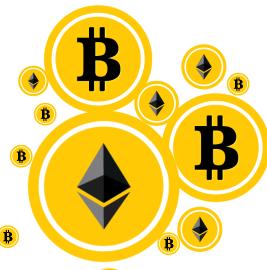

Our computers are setup to calculate cryptographichash functions. They bundle the transactions of past 10 minutes in a new "transaction block"

Our Mining computers calculate new hash values based on combination of previous hash value

Transaction gets verified and reward is generated. A & B's Transfers gets covered under more recent transaction

- Used by more than 500,000 businesses worldwide!
- Emerging at pace as now accepted more!
- Money is transferred instantly and easily!

## How are Cryptocurrency rewarded?

#3

#5

We solve complex Mathematical problems through computer software.

The Cryptocurrency network changes the complexity of the math problem depending on time consumed.

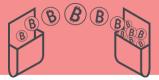

As the time goes by, the equation gets more difficult! That's why we are investing in best hardware and mining in pool.

Once solved, the block is created and put in BlockChain - a Public Ledger.

#2

#6

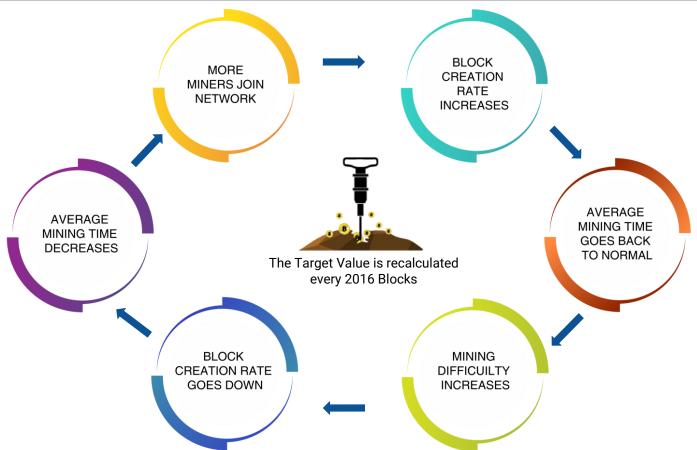

We get a fraction of Cryptocurrency in exchange.

In the mining pool, each miner is rewarded with a fraction of cryptocurrency proportionate to the amount of effort he provides.

# World on Cryptocurrency!

A Limitless Future

Overall, cryptocurrencies have a long way to go before they eclipse credit cards and traditional currencies as a tool for global commerce. They have displayed potential as an investment alternative, but are still not a must have asset class in your portfolio. In the next several years, cryptocurrencies are likely to evolve into a niche electronic currency that could become a realistic alternative

#### Yes, cryptocurrency is Secure.

Cryptocurrency miners help keep the network secure by approving transactions. Mining is an important and integral part of Cryptocurrency that ensures fairness while keeping the Cryptocurrency network stable, safe and secure. Cryptocurrency is a decentralised system, it pushes some security responsibility and control to the end users, especially responsibility for securing private keys that are used to validate transactions. Cryptocurrency security does not rely on access control. Transactions can be conducted over a public network, cannot be forged, and cannot be modified once validated by several nodes on the blockchain. Transaction data cannot be used to re-send payments, as the transaction is only good for those recipients who can unlock the transaction by having the proper key.

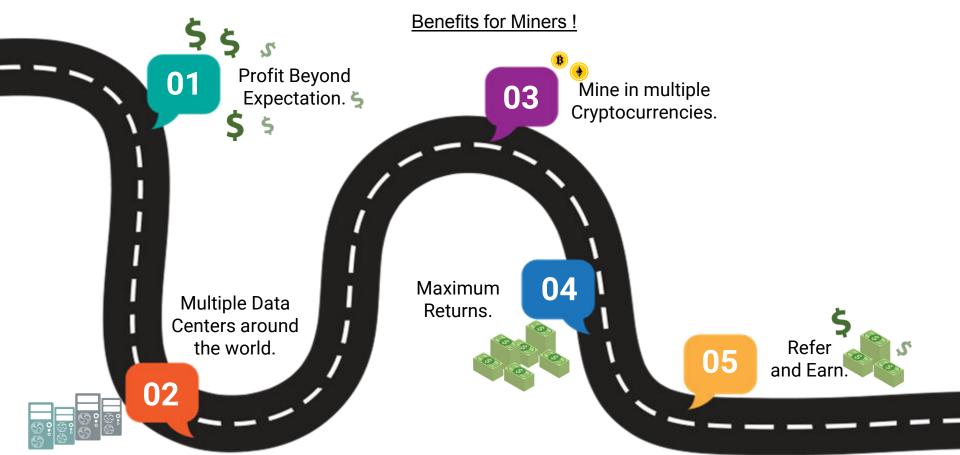

# WHAT is CONOMA

Coinomia is an opportunity that provides the user a platform to mine bitcoins, ethereum and other alternate coins without owning and maintaining a complex hardware setup. We also sell the most efficient and reliable rigs for mining to produce profits for the users. Users can also gain power by inviting friends to coinomia. We are mining since early 2014, even before Ethereum was Live! we have centers across the world and we have invested in latest ASIC chips and mining equipments.

Coinomia is an application for mining in cryptocurrencies with any of the available gadgets, a user have. Designed to cater both new miners and power users, Coinomia requires no configuration at any device. The power allotment can be managed from anywhere and can be distributed among various cryptocurrencies.

We invest in the most advanced hardware and mining in pool to generate multiple cryptocurrencies!

We provide an option to generate the Cryptocurrency through autopilot, without owning or maintaining the hardware!

We provide an option to generate the user chosen cryptocurrency on complete Autopilot.

# Advantages of Cloud Mining!

**Cloud Mining** 

## The Biggest Challenge and the Solution

We have a Mining experience of 3 years and we have come across various advancements, and have worked upon them smartly! With Frequent power cuts and load shedding, Mining gets hampered on a very large scale globally. However we at "Coinomia" have endless supply of uninterrupted energy directly from nature. We have invested in green energy i.e. solar plants that guarantees the power for coming years. We have our centers in plains of India and China with ample of sunlight throughout the year.
